Since starting university in 2020, I began programming with Python and later improved my algorithmic thinking through C++. I have developed both front-end and back-end projects using Angular, React, Prisma, NodeJs, HTML5, and CSS, along with experience in database design and management. My graduation project focused on mapping with a smart vacuum cleaner, and I also conducted government-funded research on sensor-based measurement of plant water consumption using evaporation pan techniques to support precision agriculture. I am a native Turkish speaker and fluent in English. Currently, I work on data enrichment, specializing in web scraping and automation.

SKILLS

JavaScript	Python	CSS	Sensors	n8n
AngularJs	Prisma	ReactJS	Make	Relational Databases
TypeScript	NodeJs	Arduinio	MySQL	C++
Literature	HTML5	LTspice	ExpressJS	Docker/Container Techs

WORK EXPERIENCE

Huawei Istanbul
July 2024 - August
2024

Front-End Developer (Summer Internship, Hybrid)

I focused on front-end development with a strong emphasis on AngularJS. Additionally, I acquired foundational knowledge in backend development, allowing me to integrate and manage data more effectively in my projects.

Alanya Alaaddin
Keykubat Universty
IT Department
Nov 2024 - May 2025

IT Assistant (Part Time, On office)

Supporting coding and development tasks within the IT department, contributing to technical solutions and assisting with coding projects to optimize operations; additionally, provided support in general maintenance and collaborated in practical problem-solving and repair activities across the department.

SALIXUS Technology
2025 August - 2025
September

Software Developer (Summer Internship, On office)

During this internship, I am developing an interactive Erasmus exam preparation platform using React, Tailwind CSS, Prisma.js, and MySQL. I am gaining hands-on experience in full-stack development, database modeling, and user-centered design. I will graduate upon completion of this internship. (<https://ingilizceprep.com/>)

Remax/ WISE
(Portugal)
2025 October -
Present

IT Assistant (Full Time, On office)

Built automated data enrichment pipeline for Portuguese real estate companies using Node.js, Puppeteer, and Make automation platform. Developed multi-source scraping solutions. LinkedIn, Idealista scraping with tools. Designed and implemented static web applications with full-stack features, ensuring responsive user interfaces and seamless page transitions; utilized Supabase for database and backend integration, and deployed applications on Vercel.

EDUCATION

Alanya Alaaddin
Keykubat Universty
Sep 2020 - Aug 2025

Electrical and Electronical Engineering (English)

Graduated from the Electrical-Electronics Engineering (English) department with a GPA of 2.94 ; previously awarded an Honor Certificate by my university and successfully completed a TUBITAK project.

Bialystok University
of Technology -
Bialystok
Oct 2022 - Feb 2023

Electrical and Electronical Engineering (English)

In the fall semester of the 2022-2023 academic year, I received a scholarship through the Erasmus Program and studied in Poland.

Kyrgyzstan Turkey
Manas University -
Bishkek
Feb 2024 - June
2024

Electrical and Electronical Engineering (Turkish - Krygz)

In the spring semester of 2023-2024 academic year, I received a scholarship for studying with Orhun Student Exchange Program.
